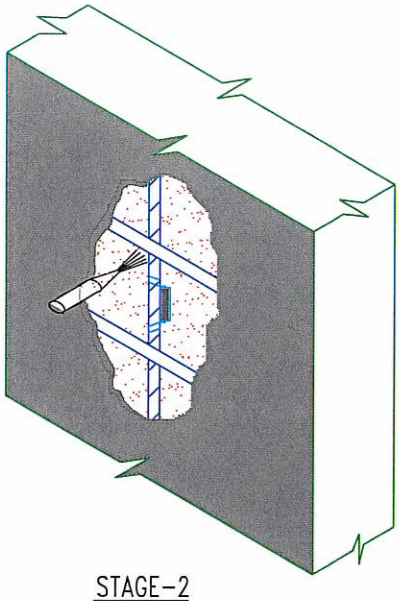
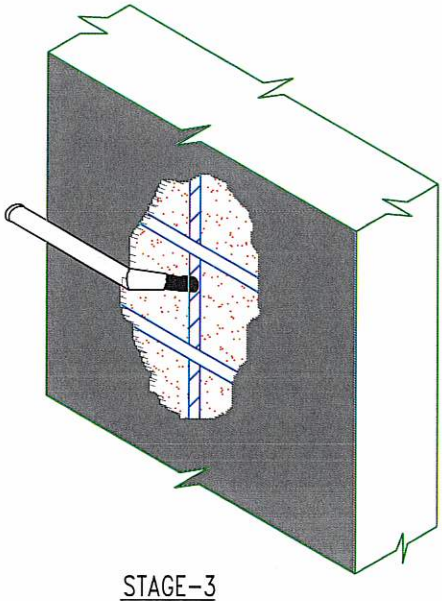
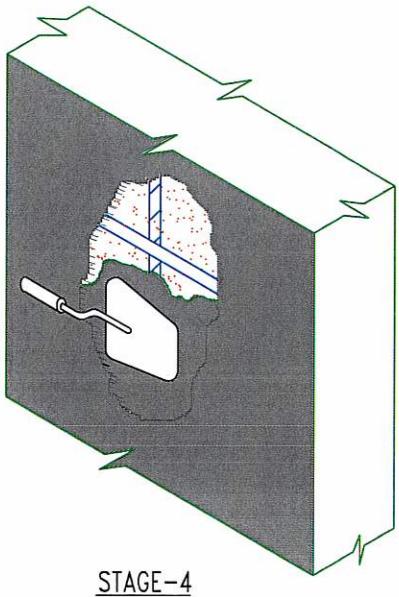
STAGE-1



STAGE-2



STAGE-3



STAGE-4

## SEQUENCE OF OPERATIONS:

1. EXISTING LOOSE PLASTER/CONCRETE TO BE REMOVED THOROUGHLY BY CHIPPING, TO EXPOSE HARD CONCRETE.
2. EXPOSED REINFORCEMENT TO BE THOROUGHLY CLEANED USING WIRE BRUSH/EMERYCLOTH/BUFFING WHEEL/WATER JET.
3. SACRIFICIAL ZONC ANODE SHALL BE PROVIDED AS PER STANDARD PRACTICE/MANUFACTURER'S SPECIFICATION
4. TWO COATS OF ANTI-CORROSIVE CHEMICAL AND A COAT OF CORROSION INHIBITOR TO BE PROVIDED ON THE EXPOSED REINFORCEMENT AND CLEANED CONCRETE SURFACE RESPECTIVELY.
5. THE CONCRETE SURFACE TO BE FINISHED WITH POLYMER MODIFIED MORTAR IN FLUSH WITH ADJACENT SURFACE.

## NOTE:

IF THE THICKNESS OF POLYMER MODIFIED MORTAR LAYER EXCEEDS 20mm, A LAYER OF WELD MESH 50X50X3mmSHALL BE PLACED AND FIXED TO CONCRETE USING CONCRETE NAILS

# SPECIFICATIONS

## SPECIFICATION FOR ANTI CORROSIVE CHEMICAL

| | | |
|---|---|---|
| **Type** | : | Zinc based two parts epoxy-phenolic / polyurethane coating suitable for application to ferrous surfaces |
| **Pot life** | : | Shall not be less than 6 hrs. at 25 °C -35 °C |
| **Consistency** | : | Brushable to form a continuous formation |
| **Requirements** | : | Shall be applied directly on the prepared surface of ferrous metal to achieve intimate contact with the base metal |
| **Wet film thickness (WFT)** | : | 135 microns (Min) |
| **Dry film thickness (DFT)** | : | 40 microns (Min) |
| **Surface preparation** | : | Wire brushing / buffing wheel / solvent free from chlorides or any suitable means |
| **Curing** | : | 45 minutes (air curing) |
| **Source of Anticorrosive chemical** | : | **"MasterEmacoP 130"**<br>M/s. BASF India Ltd.<br>Bangalore<br><br>**"CEMPATCH R"**<br>M/s. # SPECIFICATION FOR CORROSION INHIBITOR

| | | |
|---|---|---|
| **Type** | : | Concrete penetrating corrosion inhibitors |
| **Surface preparation** | : | Surface should be free from oil, laitance, grease, loose particles, etc. by wire brushing/ sand blasting/ water jet |
| **Service condition** | : | a. Shall resist carbon di oxide, chloride, sulphate and other dilute acids<br>b. Shall penetrate concrete to a min. of depth 200 mm and resist corrosion of embedded rebars<br>c. Shall be non-toxic and free from nitrate and Chromate |
| **Application** | : | Brushing / Spray gun |
| **Application dosage** | : | 2 to 4 $m^2/l$ or as per manufacturer specifications |
| **Available sources** | : | **"MasterProtect 8000CI"** from M/s. BASF India Ltd., Bangalore<br>**"Conplast CN"** M/s. Fosroc Chemicals (India) Pvt. Ltd.<br>**or any equivalent** |

## SPECIFICATIONS FOR POLYMER MODIFIED MORTAR

| | | |
|---|---|---|
| **Type** | : | Structural grade polymer modified mortar (Pre packed dual shrinkage compensated) |
| **Material requirement** | : | Ready to use polymer modified cementatious mortar |
| **Mix proportion** | : | Mortar shall prepared be as per manufacturers recommendations |
| **Consistency** | : | Trowellable consistency |
| **Surface preparation** | : | Identified concrete surface shall thoroughly roughened by chipping, followed by water jet cleaning |
| **Bonding agent** | : | Surface shall be primed with acrylic bonding agent prior to application of mortar. |
| **Recommended thickness** | : | Not more than 12 mm per layer |
| **Curing** | : | Air curing |
| **Flexural strength** | : | Not less than 4.5 $N/mm^2$ |
| **Compressive strength** | : | Not less than 15 $N/mm^2$ for 7 days<br>Not less than 25 $N/mm^2$ for 28 days |

BUILDING TRUST

PRODUCT DATA SHEET

# Sika® Injection-203

Elastic PUR-Injection resin for permanent watertight sealing

## DESCRIPTION

Sika® Injection-203 is a low viscous, elastic and solvent-free polyurethane injection resin, which cures in both dry and wet conditions to form an elastic, watertight filling and sealing material.

## USES

Sika® Injection-203 may only be used by experienced professionals.

- Sika® Injection-203 is used for permanent watertight sealing with some flexibility of dry, damp or water-bearing cracks and joints in concrete, brickwork and natural stonework
- Sika® Injection-203 can be used for the injection of the SikaFuko® System (non re-injectable)
- For use in water-bearing cracks under hydrostatic pressure, preliminary injection shall be made with Sika® Injection-101 RC

## CHARACTERISTICS / ADVANTAGES

- Permanently elastic, can absorb limited movement
- No shrinkage in subsequent dry conditions
- Due to its low viscosity it can penetrate into narrow cracks starting from 0.2 mm in width
- Cured Sika® Injection-203 is inert and chemically-resistant
- Solvent-free, usable in ground water zones
- At cold temperature (less than 10 °C) Sika® Injection-203 can be accelerated using Sika® Injection-AC20
- Can be injected as a one component system

## APPROVALS / STANDARDS

- German ZTV-ING chapter 3, part 5 (RISS) tested (BASt listed)
- German KTW drinking water certificate
- Concrete injection for ductile filling of cracks, voids and interstices (D) according to EN 1504-5:2004, Declaration of Performance 57838186, certified by notified factory production control certification body 0761 and provided with the CE marking.

## PRODUCT INFORMATION

| | | | |
|---|---|---|---|
| **Chemical Base** | Solvent free, water reactive 2-component polyurethane resin | | |
| **Packaging** | Component A | 10.0 and 20.0 kg | |
| | Component B | 5.5 and 11.0 kg | |
| **Colour** | Component A | yellow | |
| | Component B | brown | |
| **Shelf Life** | 24 months shelf life from date of production if stored properly in undamaged, unopened, original sealed packaging. | | |
| **Storage Conditions** | Dry storage at temperatures from +5 °C up to +35 °C. Protect from direct sunlight and humidity. | | |
| **Density** | Component A | ~0.97 kg/l | (ISO 2811)) |
| | Component B | ~1.10 kg/l | |

## ECOLOGY HEALTH AND SAFETY

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety-related data.

## LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request. It may be necessary to adapt the above disclaimer to specific local laws and regulations. Any changes to this disclaimer may only be implemented with permission of Sika® Corporate Legal in Baar.

# MEMORANDUM OF UNDERSTANDING (MOU) COPY-WITH AMENDMENTS

**MEMORANDUM OF UNDERSTANDING BETWEEN**
**ARMY WELFARE HOUSING ORGANISATION**
**AND**
**M/S BUREAU VERITAS (INDIA) PVT LTD**
**DATED 27 DEC 22**
**FOR**
**STRUCTURAL ASSESSMENT AND CONSULTANCY FOR ANALYSIS, NDT , RETROFITTING SCHEME FOR TOWER B & C ONLY AND PREPARATION OF FINAL BOQ FOR ALL DESTRESSES (BOTH STRCUTURAL AND NON-STRUCTURAL IN TOWER A, B & C), AT AWHO PROJECT SSI, KOCHI**

1. M/S Bureau Veritas (India) Pvt Ltd, Bangalore hereinafter referred to as BVIL represented by, Managing Director, BVIL and Army Welfare Housing Organisation hereinafter referred to as 'AWHO' represented by the Managing Director, AWHO, New Delhi, and hereinafter jointly referred to as participants.

2. Please refer to under mentioned reports, work order and proposals :-

(a) AWHO **Work Order** issued for proof checking, retrofitting scheme and preparation of BOQ for retrofitting of SSI, AWHO, Kochi forwarded vide AWHO letter No. dated No B/03029/ SSI/ Job work/ Thurs/CHN/AWHO no dated 25 Aug 22.

(b) Based on the above work order (Refer Para 2(a)), the **Final Analysis Report** of Tower B & C, which was received on 13 Oct 22.

(c) BVIL's Site Visit Report on 13 Oct 22 forwarded vide this office letter No B/03029/ SSI/ Mon/CHN/AWHO dated 17 Oct 2022.

(d) BVIL's Site Visit Report on 13 Oct 22 forwarded by BVIL vide their email dated 21 Oct 22.

(e) Ref your e- Mail dated 25 Oct 22 vide which your Technical Commercial Proposal **No IND.B.7.2022.300 DR-R3 4480974 dt 25 Oct 22** was received by this office.

3. M/S Bureau Veritas (India) Pvt Ltd (BVIL) have accepted the proposal to take up the structural assessment and consultancy for analysis of **AWHO PROJECT SSI, KOCHI** to include structural analysis of Tower B & C and suggest the retrofitting scheme at Chanderkunj Army Towers, Vytilla, Ernakulam on the payment basis.

BUREAU VERITAS (INDIA) PRIVATE LIMITED BANGALORE

The following understanding has reached between the two parties :-

4. The scope of structural consultancy entrusted to BVIL shall involve as discussed in following Paras.

5. **Present Condition Assessment**. The focus here will be to gather the information available about the project, where BVIL shall need inputs like architectural plans of the buildings, good for construction structural drawings of the buildings, soil investigation reports, pile load test report etc. The main objectives here will be to identify the points of distress, carryout non-destructive testing by the Bureau Veritas, and to quantify the extent of distress. The data obtained from the non-destructive testing conducted will be used for finding the extent of distress. The distress shall also to be classified as structural distress and non-structural distress, based upon the way of occurrence. The findings generated because of these assessments shall be documented as a report, which forms the basis of further analysis. Most of the documents / drawing have already been handed over to BVIL along with structural model prepared by Govt Engg college which can be made use of as required by BVIL. BVIL will prepare the new models with applicable code during construction. BVIL suggested to check the towers B & C with IS16700 and had detailed discussion on the same; since IS code 16700 was released in 2017 and IS 16700 will not be considered as per the directions of AWHO.

6. **Design Basis Report.** The design basis report is a document which depicts all details pertaining to the assumptions being adopted in the structural analysis process of the building. it will also clearly define the magnitude of loads being considered, type of structural analysis being performed, methodology of numerical solution used and design philosophy being adopted for the building. This document shall be finalized by BVIL.

7. **Structural Analysis and Design Report**. The structural analysis and design report is a set of documents which will define the steps being adopted in the structural analysis and design process of different structural components of the building like foundations, columns, beams, slabs etc. The present-day structural capacity of the building will be mapped against the structural demand to quantify the gap between both. The extent of retrofit as well as the method of retrofit to be decided based on it. This report forms the tangible base for the development of detailed retrofitting structural drawings. The proposed retrofitting in any way do not plan to alter the geometry and configuration of the building and the structural adequacy based on as built condition will only be addressed. There may be changes in sizes of existing structural elements based on design capacity requirement.

8. **Retrofitting Structural Drawing.** The retrofitting structural drawings shows the minute details pertaining to each structural component of the building like reinforcements to be adopted, their layout, spacing. grade of reinforcement, grade of concrete etc. The dimensions of RCC structural members like columns, beams and shear-walls will be taken from a site survey and manual inspection. The reinforcement details like bar diameter, spacing etc. will be taken from the latest structural drawing issued for construction. The bar

BUREAU VERITAS (INDIA) PRIVATE LIMITED BANGALORE

diameter and spacing will be randomly checked by using a rebar scanner. The foundation details are taken from the as built drawings available, as actual dimensions and reinforcement layouts are out of reach of our investigations. The quantity survey team of Bureau Veritas will finalize the bill of quantities (BOQ) only after taking inputs from the design report. The **retrofitting structural drawings** shall be part of this contract agreement and shall be provided along with structural analysis & design report.

9. **Site Visits and Site Inspection Report**. Visit to the site for NDT tests, inspection of the progress of the tests and check the compliance of structural drawings shall be done as per the requirement of BVIL. The expense/ cost of such visits will be included in your proposal. A report on the inspection carried out shall be prepared and sent to AWHO after such visits.

10. The RWA and AWHO will extend necessary co-operation and assistance to BVIL during the said work, furnish the required documents/ drawings to BVIL as required and assist BVIL to inspect the various buildings under the work. The following soft copy and hardcopies will be provided by AWHO for Tower B & C, if not already provided earlier :-

(a) Survey Report of the area

(b) Soil Test Report

(c) Final Architectural Drawings

(d) Final Structural Framing Drawings / GA drawings

(e) Structural Drawings – Reinforcement Drawings of Structural components

(i) Pile layout and details

(ii) Pile cap details

(iii) Plinth Beam Details

(iv) Column & Shear Walls

(v) Slabs and Beams Reinforcement details all floors

(vi) Staircase Details

## SCOPE OF WORK

11. In view of the above, it is proposed to carry out a detailed stability evaluation study as illustrated in different parts in the succeeding paras:-

12. **Part A : Visual Inspection**

(a) Visual inspection will be done to assess the condition of the structure. All the structural elements above the basement level, at least 70% of the elements to be inspected based on site situation.

(b) Identify any signs of structural distress and deformation and any signs of material deterioration.

(c) Preparation of visual inspection report along with observation, photographs and propose the NDT plan for of distressed members for further evaluation.

13. **Part B : NDT on RC Members/ Concrete**. The RWA and AWHO will extend necessary co-operation and assist BVIL to inspect the various buildings under the work. Necessary coordination will be done by the Project Director of AWHO at Kochi with RWA. The cost of labour, material i.e. ladders, tools, scaffolding etc should be separated from your proposal. ( Ref. clause 22d)

(a) Dimensional verification of the existing structural members with existing as-built drawings for theoretical verification.

(b) Carrying out Ultrasonic Pulse Velocity Test on distressed and all accessible RC members at all floors for assessment of quality/in-situ strength of concrete as per IS 516 Part 5/Sec1:2018.

(c) Carry out Rebound Hammer Test on distressed and all accessible RC members at all floors for assessment of surface hardness and strength of concrete as per IS 516 Part 5/Sec 4:2020.

(d) Carry out Cover Meter Test on distressed and all accessible RC members at all floors for detecting disposition of re-bars and thickness of cover concrete provided as IS 1881Part 204:1988.

(e) Carrying out Half-Cell Potential measurement test on distressed and identified RC members to assess the extent of corrosion & mapping of corrosion as per IS 516 Part 5/Sec-2:2021.

(f) Carry out carbonation test on randomly identified RC members to assess the depth of carbonation in cover concrete as per IS 516 Part 5/Sec-3:2021.

(g) Carrying out chemical analysis of concrete for assessment of chloride content as per IS: 14959 part II-2001, Sulphate Content as per BS: 1881 (Part 124) – 2015 and pH value as per IS: 2720 (Part 26): 1987 (RA 2021) of concrete through samples collected at site.

(h) Carrying out electrical resistivity test (resipod test) on RC members to estimate the likelihood of corrosion NDT on RC structural

BUREAU VERITAS (INDIA) PRIVATE LIMITED BANGALORE

elements will be done with random sampling covering columns, shear walls, beams, and slabs. The structural members NDT location shall be decided based on visual inspections.

14. **Part C : Theoretical Verification And Design Check**. Theoretical Evaluation and Structural Assessment for Tower B & C only. **Structural Assessment of Tower A is not included** in the scope of work, however, non-structural assessment of any distresses to be checked and included in the final BOQ for Tower A, B & C. The evaluation and assessment will be carried as :-

(a) Carryout three dimensional analysis of the structural system of the structure using appropriate analysis and software- ETABS.

(b) Carry out theoretical analysis & design check of the members for critical load combinations present loading & compliance with prevailing seismic conditions.

(c) Evaluation of Foundation.

(d) Evaluation of Columns & Shear Walls-All Floors.

(e) Evaluation of Slabs of Floors (Random sampling).

(f) Evaluation of Beams for Floors (Random sampling).

(g) Evaluation of Staircase.

15. **Reference Codes & Standards**. It is hereby informed that the said project was constructed and completed in the year 2018, thus the design of the building shall comply with prevailing IS codes during construction of the building. The IS codes to be followed in Structural Assessment of Tower B & Tower C are as under:-

(a) IS 456: 2000 – Code of Practice for Plain & Reinforced Concrete.

(b) IS 875: Part 1: 1987 – Code of practice for design loads (Other than Earthquake)for buildings & Structures.

(c) IS 875: Part 2: 1987 – Code of practice for design loads (Other than Earthquake)for buildings & Structures.

(d) IS 875: Part 3: 2015 – Code of practice for design loads (Other than Earthquake)for buildings & Structures.

(e) IS 1893: Part 1– 2002 Criteria for Earthquake Resistant Design of Structures.

(f) IS 13920: 1993 – Code of Practice for Ductile Design & Detailing of Reinforced Concrete Structures Subjected to Seismic Forces

BUREAU VERITAS (INDIA) PRIVATE LIMITED BANGALORE

16. **Part D : Restoration Measures.**

(a) Suggest appropriate restoration measures for repairs and rehabilitation works based on NDT results and theoretical analysis and design check.

(b) Methodology, scheme and sketches for repairs & rehabilitation.

(c) Suggest material Specifications for the repairs and rehabilitation works.

17. **Part E : Preparation of Tentative Cost Estimate (BOQ).** Based on the proposed repairs and restoration measures, preparation of bill of quantities for material and labour component for proposed repair/ strengthening work. The BOQ may vary as per site condition and should be as per prevailing market rates. The final BOQ should include all quantities required for structural repairs in Tower B & C. It should also include the non-structural repairs that are required in Towers B & C as witnessed and highlighted in the report dated Apr 2021 and BOQ 1.

18. **Part F : Suggestion of Technically Qualified Companies.** Based on the proposed repairs and restoration measures and BOQ, BVIL will suggest three names of reputed and technically qualified firms/ companies that have prior experience of carrying such restoration works and will carry out the suggested restoration scheme as per SOP. BVIL will assist AWHO in shortlisting and selection of a firm to carry out the suggested restoration work.

19. **Part G: Monitoring/ Supervision of Restoration Works.** The supervision of the Repairs & Rehabilitation works will be done by a technically competent team of engineer of BVIL. The team will monitor the progress of work as per SOP submitted for the remedial measure by BVIL. A separate proposal will be forwarded by BVIL for supervision work along with details of the team that they suggest to employ, on payment basis.

20. **List of Deliverables**: Bureau Veritas (India) Pvt. Ltd. will submit a report wrt the above scope, which consists of:

(a) Physical observations and present condition Assessment Report.

(b) NDT evaluation of entire Tower B & C and test results. NDT test schedule will be prepared and submitted by BVIL within 15 days from the date of receipt of the work order.

(c) Theoretical Analysis & Design of structure through ETAB models prepared as per all provisional IS codes. ETAB models prepared will also be provided to AWHO in soft copy.

(d) Design Basis Report.

BUREAU VERITAS (INDIA) PRIVATE LIMITED BANGALORE

(e) Structural Analysis and Design Reports.

(f) Method statement for different retrofitting techniques to be adopted along with strengthening measures and sequencing of the retrofitting work.

(g) Preparation of the Final Bill of Quantities (BoQ 2) based on the methodology recommended. Also, to include additional quantities of nonstructural distresses in Tower A, B & C as suggested by BVIL in the BoQ 1 (Old BoQ submitted in Apr 21).

(h) Suggest names of three competent agencies who have executed such retrofitting work earlier.

(i) Distress Mapping Sketches.

(j) Strengthening Measures Sketches and Specifications.

(k) Detailed retrofitting structural drawings, three numbers of hard copy in A3 size drawing sheet and soft copy in .pdf file format..

21. **Professional Charges**. The professional charges for the services offered will be Rs 40,56,000/- plus 18 % GST. Terms of payment of the professional charges shall be as under :-

(a) 30% against Work Order
(b) 30% against the completion of field investigation and NDT testing.
(c) 30% against Draft Report Submission.
(d) 10% against Final Report Submission.

22. **Timeline**. The period of Structural assessment would be for a period of 04 months from the date of signing MoU. **Deliverables as mentioned above will be completed and provided to AWHO within 120 days from the** date of receipt of work order and the building will be restored to its residual life once the retrofitting work is completed.

23. **General Conditions**.

(a) AWHO shall have the right to request BVIL in writing to make any addition to BVILs scope of services. BVIL shall review such written request on mutually agreed basis.

(b) If AWHO decides to terminate this MoU or decides to drop the proposal after substantial preliminary work has been done by BVIL on the project, AWHO will pay expenditure/compensation to BVIL based on progress of the work.

(c) If BVIL decides to terminate this MoU, AWHO reserves the right to take up the remaining work in any manner it deems fit without waiting for settlements (if any) with BVIL at the risk and cost of the BVIL.

(d) As agreed, an additional proposal will be forwarded by BVIL for any additional civil work that is required on site while carrying out NDT tests. The **additional proposal for undermentioned work** will be forwarded within 30 days from date of receipt of work order:-

(i) For arranging the unskilled labours, ladders, ropes, cranes, scaffolding etc required to facilitate the testing (NDTs) and inspection by BVIL.

(ii) For the temporary patch work and repairs required after NDT tests is carried by BVIL.

(iii) Electricity and Water as required will be provided by RWA on payment basis and same should be included in the proposed cost.

(e) If any dispute/difference arises between the parties that would be settled amicably by the parties through mutual discussions failing which any party can invoke arbitration to settle the disputes through DIAC New Delhi only.

**AMENDMENTS TO MoU**
**CARRYING OUT OF STRUCTURAL ASSESSMENT AND CONSULTANCY FOR ANALYSIS, NDT, RETROFITTING SCHEME AT AWHO PROJECT, SSI VYTTILA, KOCHI**

1. PI refer :-

(a) This office letter No: B/03029/SSI/Job Work/Fri /CHN/AWHO dt 30 Dec 22 and MoU signed on 27 Dec 22. The under mentioned aments may please carried out.

(b) First Bi-weekly meeting held on 02 Feb 23 and its MOM forwarded by this office letter No. B/03029/SSI/Sat/CHN/AWHO dated 04 Feb 23.

(c) HQ AWHO lette No. B/03020/SSI/Kochi/Wed/AWHO dt 01 Feb 23.

(d) Second Bi-weekly meeting held on 16 Feb 23 and its MOM forwarded by this office letter No. B/03029/SSI/Sat/CHN/AWHO dated 18 Feb 23.

2. Certain Amendments to the Original MoU as discussed and agreed are as under mentioned:-

(a) **For- Para -17 Part E : Preparation of Tentative Cost Estimate (BOQ).** Based on the proposed repairs and restoration measures, preparation of bill of quantities for material and labour component for proposed repair/ Strengthening work. The BOQ may very as per site condition and should be as per prevailing market rates. The final BOQ should include all quantities required for structural repairs in Tower B & C. It should also include the nonstructural repairs that are

required in Towers B & C as witnessed and highlighted in the report dated Apr 2021 and BOQ.

**Read- Para 17 Part E: Preparation of Tentative Cost Estimate (BOQ).** Based on the proposed repairs and restoration measures, preparation of bill of quantities for material and labour component for proposed repair/ strengthening work. The BOQ may very as per site condition and should be as per prevailing market rates. The final BOQ should include all quantities required for structural repairs in Tower B&C. It should also include all the nonstructural repairs in ***Towers A, B, C and Club House*** as witnessed and highlighted in the report dated Apr 2021 and BOQ.

(b) **For- Para -22 Timeline.** The period of structural assessment would be for a period of 04 Months from the date of signing MoU. Deliverable as mentioned above will be completed and provided to AWHO within 120 days from the date of receipt of work order and the building will be restored to its residual life once the retrofitting work is completed.

**Read - Para -22 Timeline**. The period of structural assessment would be for a period of 04 Months from the date of signing of ***work order***. Deliverable as mentioned above will be completed and provided to AWHO within 120 days from the date of receipt of work order and the building will be restored to its residual life once the retrofitting work is completed.

(c) **Add - *Para 20 (L)*. *Distress mapping of basement retaining wall will be done by BVIL, by carrying out thermography scanning (report of thermography carried out by AWHO in Dec 22 will be shared with BVIL) and include the repairs of retaining wall in the final BOQ 2.***

**(d)** As per Para 6 of MoM discussed on 16 Feb 23 referred at Para 1 (d) above.

**Add - Para 22 (a). The Report and BOQ for Towers B & C and the Retaining Wall will be submitted as on 30 Apr 23 (120 days after signing the Work Order) and the Report and BOQ of Tower A and Club House will be submitted in 21 days post 30 Apr 23 i.e. by 21 May 23. No delay will accepted in submission of the report.**

3. The above changes have been discussed and duly approved by Mr Ravishankar and during the Bi-Weekly Meetings on 02 Feb 23 & 16 Feb 23 with rep pf RWA, AWHO and BVIL. The above changes are agreed to without any additional cost in the present MoU.

It should also include all the nonstructural repairs in ***Towers A, B, C and Club House*** as witnessed and highlighted in the report dated Apr 2021 and BOQ.

(b) **For- Para -22 Timeline.** The period of structural assessment would be for a period of 04 Months from the date of signing MoU. Deliverable as mentioned above will be completed and provided to AWHO within 120 days from the date of receipt of work order and the building will be restored to its residual life once the retrofitting work is completed.

**Read - Para -22 Timeline**. The period of structural assessment would be for a period of 04 Months from the date of signing of ***work order***. Deliverable as mentioned above will be completed and provided to AWHO within 120 days from the date of receipt of work order and the building will be restored to its residual life once the retrofitting work is completed.

(c) **Add - *Para 20 (L)*. *Distress mapping of basement retaining wall will be done by BVIL, by carrying out thermography scanning (report of thermography carried out by AWHO in Dec 22 will be shared with BVIL) and include the repairs of retaining wall in the final BOQ 2.***

**(d)** As per Para 6 of MoM discussed on 16 Feb 23 referred at Para 1 (d) above.

**Add - Para 22 (a). The Report and BOQ for Towers B & C and the Retaining Wall will be submitted as on 30 Apr 23 (120 days after signing the Work Order) and the Report and BOQ of Tower A and Club House will be submitted in 21 days post 30 Apr 23 i.e. by 21 May 23. No delay will accepted in submission of the report.**

3. The above changes have been discussed and duly approved by Mr Ravishankar and during the Bi-Weekly Meetings on 02 Feb 23 & 16 Feb 23 with rep pf RWA, AWHO and BVIL. The above changes are agreed to without any additional cost in the present MoU.

**BIWEEKLY REVIEW MTG WITH BUREAU VERITAS INDIA LIMITED (BVIL)**

1. A Biweekly Review mtg was held with reps of RWA, BVIL was held between 1100 to 1200h on 02 Feb 2023.The various points discussed during the mtg and various discussions and decisions taken are given in succeeding paragraphs. The same was attended by the following pers: -

| Ser | Name | Designation |
|---|---|---|
| (a) | Dr Shantharaju, | Technical Adviser, Design Review (BVIL) |
| (b) | Mr. Ravishankar | Sr. Manager, NDT (South),BVIL |
| (c) | Mr. Avinash | Technical Manager, NDT (Pan India) BVIL |
| (d) | Mr. Vinoth Mahendran | Senior Design Engr (BVIL) |
| (e) | Mr. Umar Sharif | Design Engr (BVIL) |
| (f) | Mr. Manjunath BS | Project Coordinator (BVIL) |
| (g) | Brig DN Bhatt | Dy MD, HQ AWHO |
| (h) | Lt Col S Singhal | Project Director, AWHO Kochi |
| (i) | Rear Admiral P Ashokan (Retd | President, RWA |
| (j) | Col MN Nair (Retd) | Exe Member, RWA |
| (k) | Col MS Yohannan (Retd) | Exe Member, RWA |
| (l) | Col NN Pillai (Retd) | Exe Member, RWA |
| (m) | Col PV Varghese (Retd) | Exe Member, RWA |

**Discussions and Decisions**

2. **Progress and Future Timeline**. Mr Manjunath (BVIL) stated that NDT has been completed up to 4th Floors of Towers B and C commencing from the basement. Dr Shantharaju (BVIL) directed that NDT should be completed by 22 Feb 23 and same was confirmed by Tech Team of BVIL.

3. **Progress on ETAB Model by BVIL (B'lore)**. Dr Shantharaju stated that the ETABS modelling including foundation and pile cap is being analysed as per the original drawings. NDT results would be fed into this model subsequently. He directed Mr Manjunath to inspected four random foundations (two each in Towers B and C) with cap and pile, so that the actual values are fed into the model. After the test the foundations

will be immediately refilled and compacted and restored to original. Mr Manjunath said that this will take about a week and all safety precautions will be observed.

4. **Documentations and Drawings.** PD stated that all documents and drawings have been submitted in PDF format to Dr Shantharaju and hard copies to Mr Manjunath, including soil investigations, pile cap and foundation reports. Dr Shantharaju and Mr Manjunath confirmed the same. However Dr Shantharaju added that there are thousands of drawings and there may be requirement for an odd one as the work progresses. PD stated that the same would be made available in the shortest time frame.

5. **Sharing Report of Chief Engineer (Kochi Area).** President requested Dy MD and PD to share the report of CE (Kochi Zone) during the visit on 03 July. Dy MD stated that all reports held with AWHO will be shared.

6. **Drone Survey**. Mr Revishankar stated that the drone operator will get in touch with PD/RWA by 05 Feb 23 and carry out a demo by 05 Feb 23.

7. **Retaining Wall**. It was confirmed by Dy MD and BVIL that Retaining Wall will now be done under the Project Management Consultancy of BVIL as requested by the RWA. The structural analysis/ thermography tests will be done along with the ongoing tests as part of the existing MoU, and repairs thereof will be included in the BOQ. President RWA wanted a clarification on the repairs strategy and guarantee. He stated that the BVIL report of May 2021 mentions repairs from positive side after two years if required. But during the visit on 13 Oct 22, Dr Shantharaju mentioned that negative side repairs are adequate and warranty of ten years can be given. Dr Shantharaju confirmed that repairs will be done only from the negative side. To reduce the pressure of water two wells will be dug with depth going down below the base of the retaining wall. Water will have to be pumped out from time to time to reduce the pressure on the wall. The repairs scheme would be included in the BVIL final report. The contractor will work under the supervision of BVIL as per the scheme recommended by BVIL and would give a guarantee of ten years which will be confirmed by BVIL.

8. **Estimation of Residual Life**. In response to the query of President RWA, Dr Shantharaju mentioned that the Report would have a separate chapter on residual life. The chapter will mention the residual life as on date with the results of the NDT incorporated. The report will also mention the residual life after the restoration is done. He added that normally buildings are designed for fifty years and the restoration work will ensure that the building will last for the period of its residual life as on the date of completion of repairs. The same shall be certified in the report.

9. **Running of Pipelines Across the Beams**. Mr Manjunath confirmed it has been all beams where pipelines are running across have been tested and core sample duly extracted and will be tested.

10. **NDT of Lift Wells**. Would be undertaken by BVIL.

11. **Other Delinked Works**. President RWA requested that the two other works delinked from the overall restoration, i.e. marble flooring and lift cladding should be done as a part of the overall restoration. However, he recommended that lift cladding tiles which are on the verge of falling (and which could pose a risk to safety) should be done forthwith. President RWA stated that he would suggest a contractor who had previously carried out cladding repairs on Tower C, 5th floor. Mr Manjunath stated that he is marking

such tiles and he would give the number by 05 Feb 23. These cladding will be undertaken for repair forthwith by AWHO and balance lift claddings will be included in the final BOQ by BVIL.

12. **Third Party Vetting**. Dr Shantharaju stated that he is open to vetting of his Report by anybody if needed.

13. **Future Reviews**. PD recommended that there should be a similar review after two weeks around. on 16 Feb 23, followed by another one on 24 Feb 23 post completion of NDT. This was concurred by BVIL.

14. For your necessary action please.

**BIWEEKLY REVIEW MTG WITH BUREAU VERITAS INDIA LIMITED (BVIL)**

1. Second Biweekly Review mtg was held with reps of RWA, BVIL was held between 1100 to 1200h on 16 Feb 2023.The various points discussed during the mtg and various discussions and decisions taken are given in succeeding paragraphs. The same was attended by the following pers: -

| Ser | Name | Designation |
|---|---|---|
| (a) | Dr Shantharaju, | Technical Adviser, Design Review, (BVIL) |
| (b) | Mr. Ravishankar | Sr. Manager, NDT (South), BVIL |

| (o) | Col PV Varghese (Retd) | Exe Member, RWA |

**Discussions and Decisions**

2. **Progress and Future Timeline**. Mr Manjunath (BVIL) stated that the tests of both Towers B and C have been completed except 16 flats (RWA to make the flats available). NDT and thermography of the retaining wall is in progress. Distress mapping of Tower A will be undertaken wef 17 Feb 23. He stated that they are on track to complete the tests by 23 Feb 23 as per schedule. Dr Shantharaju requested the President to make the 16 flats available else the defects in these flats would not be attended to by the inspection team. Also, since data about structural members of these

flats would not be available assumptions would have to be made. Also, No repairs in these flats will not be undertaken in the future.

3. **UPVT Readings**. Mr Manjunath stated that UPVT readings in the common areas and flats are showing some errors, due to thickness of the exterior plaster. Dr Shantharaju informed that if the plaster thickness is greater than 11-12 mm, it can lead to erroneous UPVT readings, thus he directed to scrape the plaster to the mother concrete and readings retaken. Mr Manjunath stated that he would forward the list of flats and areas to President RWA. Dr Shantharaju sought the assistance of the President RWA and the latter concurred. It was also decided that any area inside flat where chipping of plaster is carried out the same will be plastered by BVIL and repainted to best possible matching paint on request of the owner. The common areas will not be painted and will be duly marked by BVIL.

4. **Progress on ETAB Model by BVIL (B'lore)**. Dr Shantharaju stated that the evaluation of the foundation and pile cap is under progress and would take another ten odd days. The plan to inspect the foundation is dropped in view of the high water table, which was encounter during the test bore on 08 Feb 23. Now since physical inspection and testing of pile cap and foundation is not possible, the evaluation of the foundation would be based on the assumptions. Dr Shatharaju explained the assumption that will be made by them. He stated that the foundation and pile cap will be assumed to be as per GFC drawings and the capacity of the foundation will be taken at 80 % of the rated capacity and the same would be stated in the report. At this point President RWA stated that as per the BVIL Report dated 13 Oct 22, Tower C was rotated by $90^0$ from the GFC drawings and he wanted to know the impact of the same on the analysis. Dy MD AWHO clarified that while it is true that the orientation was changed from initial drawings which were approved by IISc, Bangalore but the building is finally built as per the amended GFC drawing though the same have not been approved by IISc, Bangalore. Dr Shantharaju stated this this is not an issue.

5. **Documentations and Drawings.** Dr Shantharaju said that there is no additional requirement at this stage. PD stated that he would forward the drawings of Tower A and Club House by 18 Feb 23.

6. **Extension of Timeline View Inclusion of Inspection of Tower A and Club House.** BVIL stated that in view of RWA's request to include the inspection of Tower A, Retaining Wall and Club House the date of submission of the Report and BOQ will have to be extended by 20 days. This was objected to by President RWA but BVIL insisted that the same is required in view of the enhanced scope of work. Dy MD directed the that **the Report and BOQ for Towers B & C and the Retaining Wall to be submitted on 30 Apr 23 (120 days after signing the Work Order) and the Report and BOQ of Tower A and Club House can be submitted in in 21 days post 30 Apr 23 i.e. by 21 May 23.**

7. **Amendment of MoU**. PD stated that he had forwarded a draft amendment and confirmation of the same was awaited from BVIL. BVIL stated that the same would be forwarded by would be forwarded by 18 Feb 23.

8. **Future Reviews**. PD recommended that there should be a similar review before the team leaves around 24/ 25 Feb 23. President RWA stated that this was very close to the GBM (on 26 Feb) and a suitable date would be intimated.

9. For your necessary action please.

**THIRD REVIEW MTG WITH BUREAU VERITAS INDIA LIMITED (BVIL)**

1. Third Review mtg was held with reps of RWA, BVIL was held between 1100 to 1200h on 15 Mar 23. The various points discussed during the mtg and various discussions and decisions taken are given in succeeding paragraphs. The same was attended by the following pers: -

| Ser | Name | Designation |
|---|---|---|
| (a) | Dr Shantharaju, | Technical Adviser, Design Review, (BVIL) |
| (b) | Mr. Ravishankar | Sr. Manager, NDT (South), BVIL |
| (c) | Mr. Avinash | Technical Manager, NDT (Pan India), BVIL |

| (n) | Col NN Pillai (Retd) | Exe Member, RWA |
| (o) | Col PV Varghese (Retd) | Exe Member, RWA |

**Discussions and Decisions**

3. **Update on Backend Work at BVIL Bengaluru**. Mr Shantharaju stated that theoretical evaluation of the foundation and pile cap would be completed by this weekend i.e. 20 March 23. However, as pervious review meeting on 18 Feb 23 the same evaluation was to be completed in ten days from then i.e. end Feb 23, however there is

delay and clearly progress is not as per plan. Request to please expedite the progress for timely submission of the report

4. **Overall Timeline.** PD AWHO wanted to know if there is any change in the overall timelines. Dr Shantharaju stated that the chemical analysis of Tower B is going slightly slow and therefore his plan is to send the draft report on Tower C, Tower A, Club House and Retaining Wall on 30 Apr and then the draft report on Tower B after three weeks on 21 May. Mr Avinash added that the chemical analysis of Tower B is going at a slow pace and this being important we do not want to dilute the same. To corroborate the correctness of tests they are sending two samples BVIL lab in Mumbai too, especially for testing of chlorine content. PD AWHO sought clarification from BVIL whether the BOQ would be submitted along with the report. Dr Shantharaju mentioned that after the report is perused by AWHO and RWA the final BOQ will be prepared based on the comments. Dy MD Tech, HQ AWHO stated that the RWA/ AWHO does not have the domain knowledge to comment on the report and therefore BVIL should not wait for comments and submit the final report including the BOQ by the agrees dates i.e. 30 Apr 23 along with the BOQ. President RWA reiterated that the deliverables of the MoU by the due date were the Report and BOQ and hence there is no reason another 15 days should be sought for the BOQ. Dy MD Tech stated that AWHO is keen that the rectification work start at the earliest in view of deteriorating structural state of the building and with that in view everyday counts. He suggested that there is still time to replan and BVIL being a professional organisation must deliver the products (Report and BOQ) within agreed timelines. Dr Shantharaju said that they would discuss it internally to achieve the best.

5. **Identification of Restoration Agency.** President RWA suggested that notwithstanding the timeline discussed above BVIL must recommend the three agencies so that the tendering process does not get delayed. Dr Ravishankar stated that while the three agencies can be recommended, any discussion can start only after the scope of work is clear which can happen only after the final BOQ is prepared. President RWA commented that we are in the same state as we were in Oct 2022, when we expected the report and BOQ and BVIL submitted only the report. Dr Shantharaju, reiterated that the case this time is different and all that BVIL is asking for additional 15 days to make the BOQ. He added that unlike new construction, preparation of BOQ is a very deliberate process for any restoration work as its entails lot of details and analysis. Dy MD Tech reiterated the need of hour is tha BVIL should meet the agreed timelines and and BVIL being a professional organisation will deliver the products (Report and BOQ) on time.

6. **Submission of Distress Survey Reports in AutoCAD.** President RWA stated that the distress survey reports of flats and common areas as recorded during the inspection is there in possession of the RWA. He requested BVIL for the reports replicated in AutoCAD, to which Dr Shantharaju stated that the same will be will part of the report and the soft copy will also be provided separately. For better clarity and comprehension, he suggested that these be printed out in A2 format and archived.

7. **Update wrt Col Ciby's Email.** PD AWHO brought out Col Ciby has sent a mail and photograph and sought confirmation from Mr Manjunath whether these have been included in the survey report and the latter agreed in the affirmative. He added that after Col Ciby had reported corrosion of underlying bars in the flooring of C 0204 where refilling was being done, the same was inspected after permission from RWA and the distress was recorded. Mr Ravishankar requested the President RWA to inform all

owners that anyone in possession of any data should submit the same to BVIL. Photographs should be properly annotated with date and location, so that the same can be replicated on the distress map. President RWA stated that he has got a list of defects reported by owners prior to the inspection and that he would be sending the same and these too should be included in the distress map, so that nothing is missed. Dr Shantharaju stated that three flats in Tower B and C and 22 flats in Tower A were not inspected as the same were not provided by the owners. Repairs will not be undertaken in these flats. Also, it will be mentioned in the report that 'for the sake of making structural analysis, it will be assumed that the distress in these flats follows the same pattern as the inspected flats.'

8. **Completion of Post NDT Patchwork Repairs**. PD AWHO sought conformation from President RWA whether this has been done and the latter replied in the affirmative.

9. **Amendment of MoU**. PD stated that he has forwarded the final amendment of the MOU to BVIL for signatures and the same is awaited from BVIL duly signed. BVIL stated that the same would be forwarded at the earliest.

10. **Future Reviews**. PD recommended that there next review meeting will be done after 14 days i.e. by end Mar 23 ( 28/ 29 Mar 23).

11. Dy MD Tech, AWHO concluded the meeting stating that AWHO has to answer its Higher Management on the progress of work and he requested BVIL to pool in all their resources and commitment to ensure that the agreed timelines are met which a prestigious organisation like BVIL is definitely capable of.

12. For your necessary action please.

**FOURTH REVIEW MTG WITH BUREAU VERITAS INDIA LIMITED (BVIL)**

1. Fourth Review mtg was held with reps of RWA, BVIL was held between **1100h to 1200h on 03 Apr 23**. The various points discussed during the mtg and various discussions and decisions taken are given in succeeding paragraphs. The same was attended by the following pers: -

| Ser | Name | Designation |
|---|---|---|
| (a) | Dr Shantharaju, | Technical Adviser, Design Review, (BVIL) |
| (b) | Mr. Ravishankar | Sr. Manager, NDT (South), BVIL |
| (c) | Mr. Avinash | Technical Manager, NDT (Pan India), BVIL |
| (d) | Mr. Vinoth Mahendran | Senior Design Engr, (BVIL) |
| (e) | Mr. Umar Sharif | Design Engr, (BVIL) |
| (f) | Mr. Manjunath BS | Project Coordinator, (BVIL) |
| (g) | Mr. Vijay HV | Manager, NDT & RR, BVIL |
| (h) | Mr. Girish R | Manager, NDT (South), BVIL |
| (i) | Brig DN Bhatt | Dy MD, HQ AWHO |
| (j) | Lt Col S Singhal | Project Director, AWHO Kochi |
| (k) | Rear Admiral P Ashokan (Retd) | President, RWA |
| (l) | Col MN Nair (Retd) | Exe Member, RWA |
| (m) | Col MS Yohannan (Retd) | Exe Member, RWA |
| (n) | Col NN Pillai (Retd) | Exe Member, RWA |
| (o) | Col PV Varghese (Retd) | Exe Member, RWA |

**Discussions and Decisions**

3. **Update on Backend Work at BVIL Bengaluru**. Mr Shantharaju stated that they have completed the slab design and analysis for all floors of Towers B and C, and they are proceeding with beam design. After this they shall be working on the columns and shear walls of both these towers. Pile evaluation will be completed in four days i.e. by the weekend.

4. **Timeline for Submission for Reports**. Dr Shantharaju stated that on 30 Apr 23 he would be submitting only the Analysis Report and the BOQ would take 10 more days post final report. President RWA stated that this was the same situation on 15 Oct 22 when it was expected that the Report and BOQ would be submitted simultaneously. Dr Shantharaju explained that the BOQ cannot be prepared till the final analysis report is prepared and will be prepared only on completion of the final analysis and the BOQ preparation will take min 10 days. After a detailed discussion with Dr Shantharaju, the BVIL team and RWA the undermentioned timelines were and agreed to :-

(a) Submission of Report of Analysis and Strengthening Methodology of Towers B and C (including Retaining Wall) – **30 Apr 23.** The final report would be sent to AWHO and RWA and their inputs if any will be incorporated.

(b) Submission of BOQ for Towers B and C – **10 May 23.**

(c) Submission of Analysis and BOQ of Tower A and Club House – **21 May 23.**

5. **Repairs of Lift Wall Cladding And Entrance Lobby Floor**. There was a bit of confusion from BVIL side during the discussion, whether the final BOQ will include repairs of lift wall cladding and entrance lobby (green marble) floor. Later, after detialed discussion with Mr Ravihankar, Dr Shantharaju confirmed that besides structural repairs the BOQ will cover all non-structural repairs including lift wall cladding, retaining wall, entrance lobby (green marble) floor etc.

6. **Additions to BOQ**. PD stated that the following repairs be added to the BOQ since these would not be taken up separately as previously decided and the same was agreed by BVIL :-

(a) Repairs of Water Tank of Club House.

(b) Repair and fixing of 200 wall cladding tiles which was previously planned to be done immediately. This additional quantity is in addition to the repair of other wall cladding which was noticed and earmarked during the distress survey.

7. **Points by President RWA**.

(a) **Distress Mapping**. President RWA requested if the distress map (PDF copy) can be submitted by 15 Apr 23. BVIL agreed to share the same and said that they will email the PDF of distress maps (will also be part of the final report) prepared by 15 Apr 23.

(b) **Inclusion of Additional Distress**. President RWA mentioned that the residents have reported a few additional defects and the same will be shared via email to BVIL and the same should be added to the distress map. Dr Shantharaju agreed that all such defects would be added.

8. **Submission of Details of Three Specialist Agencies**. PD reiterated that the list of the agencies should be submitted along with the Reports of Towers B and C on 30 Apr 23 and the same was agreed to by BVIL.

9. **Next Review**. 25 April 23 was agreed by all.
